FEEDBACK

ABOUT

ABOUT

The Guide is a national, online resource for Canadian registrarial and pathway practitioners and policy developers. It contains standards, definitions, and additional resources for close to 500 transcript and transfer credit terms in an online, searchable format. This resource is intended to encourage best practice and enhance student mobility and data portability.

Principles supporting the Guide are available online.

The Guide results from a multi-year research and consultation exercise involving Canadian postsecondary institutions and allied organizations including the councils on articulation/admissions and transfer and the registrarial regional associations from across the country. More information about the research project is available online.

If you have a question about the Guide or would like to suggest a standard or term be refined or added, complete the Guide feedback form available online.

Information release: Launch of the ARUCC PCCAT Transcript and Transfer Guide – guide.pccat.arucc.ca

Enhancing student mobility through national collaboration

The Association of Registrars of the Universities and Colleges of Canada (ARUCC) and the Pan-Canadian Consortium on Admissions and Transfer (PCCAT) are pleased to announce the launch of the national ARUCC PCCAT Transcript and Transfer Guide (the "Guide").

The *Guide* is a one-stop, online resource for policy developers and practitioners. It contains a wealth of information about transcript standards, transfer nomenclature, and links to best practice resources, research, and scholarly literature. With the launch of the *Guide*, direct access to tools and research becomes achievable for postsecondary leaders when developing institutional credentials and transfer pathways.

The *Guide* results from extensive national research and consultation with postsecondary experts across Canada's colleges, institutes, polytechnics, universities, and allied organizations.

Ensuring the Guide's currency

To ensure the **Guide's** ongoing currency and focus, ARUCC and PCCAT have endorsed the following principles which, taken together, are intended to steer future implementation and/or modification of its core content.

Future evolutions of the Guide and its contents should continue to

Sustain student-centered approaches in the support, creation and execution of transcription and transfer standards

To that end, changes to the content should be mindful of the need to support student retention, mobility, success and engagement in Canadian postsecondary education. This is true whether a student's individual

Ensuring the Guide's currency

To ensure the *Guide's* ongoing currency and focus, ARUCC and PCCAT have endorsed the following principles which, taken together, are intended to steer future implementation and/or modification of its core content.

Future evolutions of the Guide and its contents should continue to

Sustain student-centered approaches in the support, creation and execution of transcription and transfer standards

To that end, changes to the content should be mindful of the need to support student retention, mobility, success and engagement in Canadian postsecondary education. This is true whether a student's individual experience occurs within an institution or across multiple learning organizations.

Recognize institutional and provincial autonomy and authority

To that end, future changes to the Guide should be achieved through collaboration and dialogue informed by research.

Support the academic preeminence and quality of Canadian educational institutions.

To that end, any future changes need to support academic quality assurance standards and assessment practices related to transcription and transfer. Future changes to the Guide should be supported by practices and standards development that are informed by research; decisions regarding standards should be evidence-based and in keeping with academic principles.

Facilitate student mobility by supporting transparent and clear standards that are informed by best practice and research

Confusing language or practices and policies related to transcription and transfer should be avoided.

Respect governmental regulatory requirements such as those related to accessibility, privacy, and human rights

Moving pan-Canadian student mobility to the next level

The Guide represents one in a series of initiatives designed to improve inter-provincial student mobility and demonstrates the significant pan-Canadian interest in pursuing collaborative initiatives both within and across provinces and territories. Postsecondary institutions and allied organizations are coordinating efforts at all levels to improve student experiences and enhance educational pathways for students.

Examples of collaboration towards success

In spring 2012, ARUCC and PCCAT held Canada's first biennial joint conference on enrolment services and transfer in Ottawa focusing on strategic enrolment leadership, and student mobility and transfer.

In winter 2014, the <u>Pan-Canadian Association of Admissions and Transfer (PCCAT)</u> and the <u>Association of Registrars of the Universities and Colleges of Canada (ARUCC)</u> created a joint partnership to pursue research and development of transcript and transfer standards for the Canadian postsecondary community.

In spring 2014, ARUCC, PCCAT, and the Canadian Postsecondary Electronic Standards Council (CanPESC) partnered to establish the ARUCC Groningen and Student Mobility Task Force focused on contributing to the international dialogue on achieving student mobility through enhanced and secure student data portability. This resulted in ARUCC becoming the first international signatory to the international <u>Groningen Declaration</u> in spring 2015.

In fall 2014, four councils on articulation/admissions and transfer signed an historic, interprovincial memorandum of understanding (MOU) that formally commits these allied organizations to enhanced collaboration. Their goals include developing student pathways, reducing barriers, and, ultimately, expanding opportunities for students. The four organizations include the Alberta Council on Admissions and Transfer (ACAT), the British Columbia Council on Admissions and Transfer (BCCAT), the New Brunswick Council on Articulations and Transfer (NBCAT), and the Ontario Council on Articulation and Transfer (ONCAT).

In September 2015, Universities Canada and Colleges and Institutes Canada signed a "Framework for Collaboration" which is "is designed to help Canada succeed in the global knowledge economy by addressing the need for advanced skills in all sectors" (CICan News release, 2015). This new framework reflects the commitment of universities and colleges across the country to further enhance collaboration within and among institutions. The Framework's principles amplify a focus on mobility, collaboration, and students.

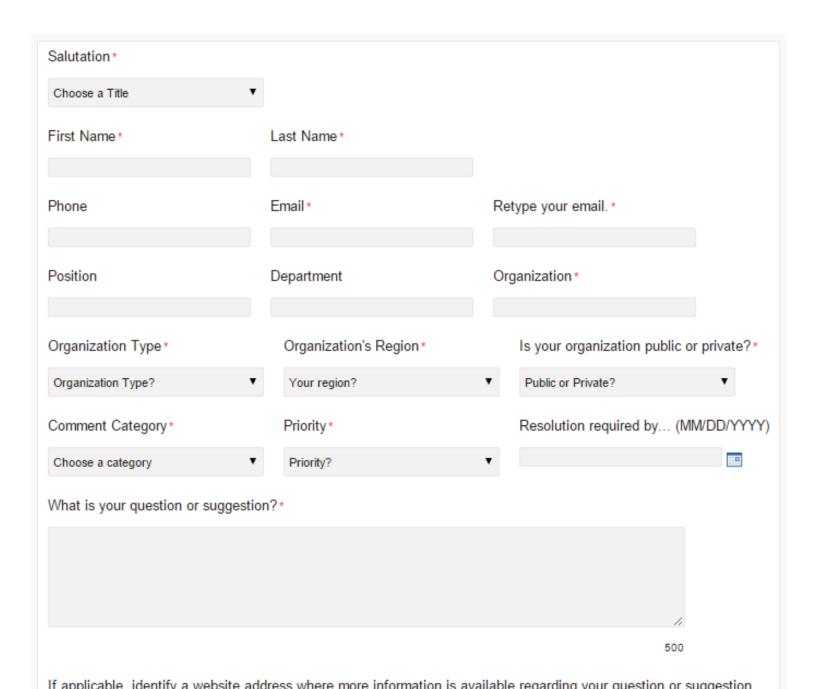

In September 2015, the provincial councils on articulation/admissions and transfer came together in Vancouver to host Canada's <u>first summit</u> focused on exploring the inter-provincial transfer and student mobility agenda.

Questions and changes to the Guide

ARUCC PCCAT GUIDE WORKING GROUP FEEDBACK FORM

ARUCC PCCAT Transcript and Transfer Guide Working Group Terms of Reference

Purpose

- To provide operational oversight for the ARUCC PCCAT Transcript and Transfer Guide (i.e, "the Guide").
- To identify and implement any changes or enhancements to the Guide.
- To monitor postsecondary trends and opportunities for the purpose of developing enhancements and changes to the Guide.
- To identify and suggest to executive committees of ARUCC and PCCAT related research projects as might emerge and be considered relevant for the Guide and to lead such research as might arise.
- To act as the primary body responsible for communicating with the membership about the Guide and to create collaborative engagement and dialogue around potential priorities for the Guide.
- To encourage ongoing usage of the Guide by the membership.

TRANSCRIPT STANDARDS

BENCHMARK YOUR INSTITUTION'S TRANSCRIPT PRACTICES AGAINST THE NEW STANDARDS

The Transcript Standards Search provides publication standards for transcript data elements on the Official Academic Transcript. Search by transcript standard using freeform text or by predefined categories. For each one you will find a definition, a transcript publication rationale, and the relevant supporting publication principles. A data standard protocol for institutional Student Record Systems and a publication protocol for the Transcript Legend are also provided. If available, the search provides the common, related glossary term associated with the transcript data element.

SEARCH THE TRANSCRIPT STANDARD AND TRANSFER GLOSSARY SIMULTANEOUSLY

- 1. Search for a term or standard using any of the fields below.
- 2. When using a search category, ensure the other fields are blank before submitting the search.

TRANSCRIPT STANDARDS SEARCH

This search will provide access to specific transcript data elements either by using the freeform field or by selecting a dropdown category. If there is a related glossary term, it will also feature in the final result.

TRANSCRIPT STANDARD PUBLICATION PRINCIPLES

Transcript standard publication principles inform and reinforce the standards in the Transcript Standards Search. The validation process reinforcing each principle results from extensive research and consultation with pan-Canadian registrarial and pathway practitioners through the ARUCC PCCAT National Transcript and Transfer Credit Nomenclature Study conducted in spring 2014 and 2015. View Transcript Standard Publication Principles.

TRANSCRIPT BEST PRACTICE PUBLICATION OPERATING PRINCIPLES

Overview

The following operating principles guided the decisions regarding the transcript publication standards for each of the Transcript Data Elements in the ARUCC PCCAT Guide. These are explained below in further detail to assist those using the Guide with understanding the rationale behind choosing a particular publication standard. As a result, not every principle is relevant to each Transcript Data Element. Those that are relevant to a particular Transcript Data Element are noted in the Transcript Standard Search results of the Guide. To assist the reader, here is a summary list of the principles:

A transcript should

- 1. Reflect the regulations of the academic body of the issuing institution (page 2)
- Function as a trusted document that demonstrates adherence to historical accuracy and quality assurance and assessment (page 2)
- Provide evidence of achievement of learning outcomes assessed through a quality assured process by a qualified person (page 2)
- 4. Be appropriately transparent in accordance with the credential being pursued (page 3)
- Document relevant academic milestones (page 3)
- 6. Avoid publication of extraneous information (page 3)
- 7. Facilitate student mobility through transparency and clarity (page 4)
- 8. Support student retention, and student and/or alumni success and engagement (page 4)
- Adhere to privacy, human rights, and/or accessibility legislation relevant in a particular jurisdiction (page 4)
- 10. Facilitate secure, validated, and trusted electronic data exchange (page 5)
- Contain information that is carefully considered and presented to avoid any potential for misinterpretation and/or bias (page 5)
- Be reflective of institutional autonomy which means that the information published is therefore sometimes dependent on institutional needs and context (page 5)

The data confirming support for these principles are contained in the Phase 1 Report and the Phase 2

associated with the transcript data element.

Rationale for Transcript Publication Standard

Notation on the Transcript facilitates assessment and understanding of academic standing, progression, or history in a course of study.

Identifying the name of the institution on the Transcript from which courses were accepted for transfer facilitates transparency and mobility.

Recording a grade from another institution as a course owned by the receiving institution without acknowledging the course as transfer credit can be viewed as problematic as the information is representation of the academic history of a student with that institution.

If an institution accepts grades from another institution and includes the results in grade calculations, then the grades should be displayed and the Transcript Legend should clearly explain the includes the results in grade calculations, then the grades should be displayed and the Transcript Legend should clearly explain the includes the results in grade calculations, then the grades should be displayed and the Transcript Legend should clearly explain the includes the results in grade calculations, then the grades should be displayed and the Transcript Legend should clearly explain the includes the results in grade calculations, and the grades in the grades in the overall cumulative average or in the term/session average.

BACKGROUND

During the research for the national ARUCC PCCAT Transcript and Transfer Credit Nomenclature Study, the Canadian postsecondary community identified core principles that should guide nomenclature development and usage for transfer policies and protocols. These also apply when institutions create inter-institutional partnerships.

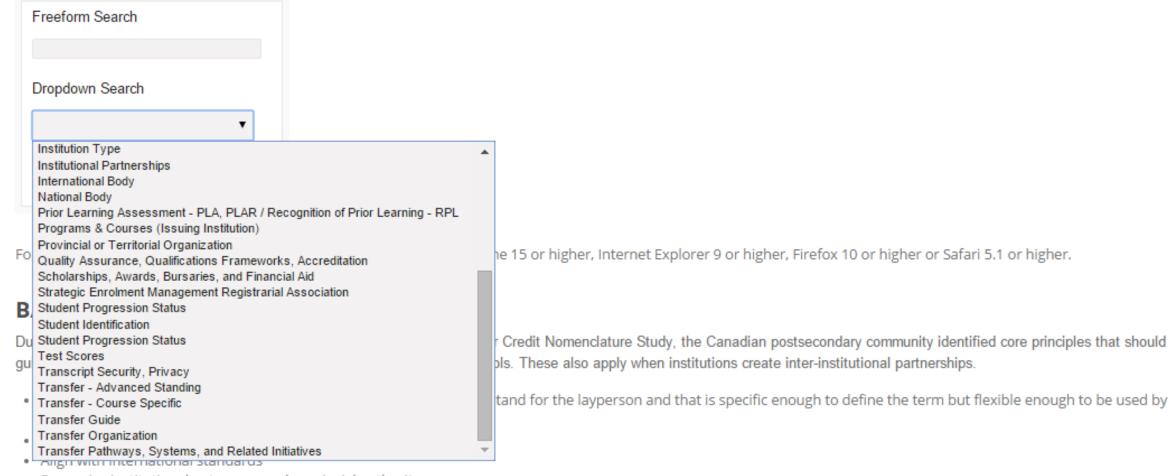

- Establish nomenclature that is consistent, clear, and simple to understand for the layperson and that is specific enough to define the term but flexible enough to be used by all institutions
- Avoid jargon
- · Align with international standards
- · Recognize institutional autonomy and provincial authority

For the Guide, more than 1,000 terms currently in use in Canada were identified and assessed. There were numerous examples provided where different labels described the same situation or the same label described different situations. The potential exists for considerable confusion. The Transfer Glossary provides access to more than 300 concise terms and

The Phase 1 ARUCC PCCAT National Transcript and Transfer Credit Nomenclature Standards Report provides national and regionally specific overviews of the progress on transcript standards and transfer credit initiatives (see pages 28 to 45). Phase 1 Full Report

ACADEMIC TRANSCRIPT: BEST PRACTICE GUIDELINES

Each of the following items is a helpful addition to the Official Academic Transcript. The information resulted from broad and deep consultation with Canadian postsecondary registrarial and pathway practitioners and policy developers and a review of sample transcripts from a number of postsecondary institutions as part of the ARUCC PCCAT National Transcript and Transfer Credit Nomenclature Standards Study.

A. General

- Title of document (e.g., Academic Transcript; Transcript of Academic Record, etc.)
- ✓ Institutional logo
- ✓ Institutional seal
- ✓ Numbered pages (e.g., Page of 1 of 3)
- ✓ Statement regarding security features (could feature on the transcript or in the transcript legend)
- ✓ Official Transcript Statement (include a statement on what makes an official transcript; could feature in the transcript legend)
- Date transcript was printed
- √ Name and signature of Registrar
- ✓ Unique transcript number

B. Institutional and student details

- ✓ Name of academic institution ("includes xx campus") if more than one campus, include all affiliated campus names and addresses in the transcript legend
- ✓ Institutional physical address (optional for the transcript: phone #, fax, email address but ensure to include this in the transcript legend)

CREATING A COMPETENCY-BASED STUDENT RECORD

EXTENDING THE TRANSCRIPT

Is your organization considering developing a competency-based student academic record to enhance student mobility as a supplement to the Official Academic Transcript? Use the following resources to begin the process.

- Framing questions to begin the creation process
- Background information: Documenting learner achievement of learning outcomes
- Australian System and Higher Education Graduation Statement (AHEGs)
- European System and Diploma Supplement
- UK System and Higher Education Achievement Report (HEAR)
- US Transcript and Transfer Practices

AACRAO "Extending the Transcript" Project

EXAMPLES OF CO-CURRICULAR RECORDS

Questions and comments arose during the research process regarding the Co-Curricular Record (CCR). The research findings from Phase 1 of the ARUCC PCCAT National Transcript and Transfer Credit Nomenclature Standards Study suggest the national community supports creating a co-curricular record that functions as a separate but complementary document to the existing Official Academic Transcript. Further, most respondents reported co-curricular information is not currently captured on the Transcript. Another national committee is developing associated standards and protocols for the co-curricular record; therefore, below are select examples of existing CCRs at different institutions to help support these conversations.

Elon University

University of Manitoba

Sample CCR

Algonquin College

BEGINNING THE DIALOGUE: CREATING A COMPETENCY-BASED STUDENT RECORD REFLECTING ACHIEVEMENT OF ACADEMIC LEARNING OUTCOMES

Introduction:

This document provides postsecondary institutions with a series of questions to facilitate initial discussions focused on developing a 'competency-based student record.' Typically, the first step involves establishing the overarching vision, goals, and objectives. The assumption here is that the ultimate vision is to enhance and facilitate student mobility by chronicling final learner achievement of predefined learning outcomes related to an individual's academic studies. The questions might change and evolve if a different vision is contemplated. Further, the assumption regarding process is that discussions would evolve in partnership with campus stakeholders, particularly academic colleagues. As each institution provides a unique context, participants involved in the creation of a competency-based student record may be different depending on the campus.

Essential Components:

The respondents to the 2015 survey for Phase 2 of the ARUCC PCCAT Transcript Standards and Transfer Credit Nomenclature Study identified the following requisite components for developing an individual student competency record:

- 1. an institution-wide definitional framework for documenting learner outcomes;
- 2. defined and approved learning outcomes by program;
- defined principles for assessing and documenting achievement of learning outcomes at the student level with a supporting rubric;
- adoption of an appropriate assessment tool (or approach) to measure final achievement of learning outcomes at the individual student level by program and level (i.e., year 1, year 2, etc.).

Extensive consultation and leadership from the academic community was also considered necessary. The process involved to create a student competency record is very complex; however, it is achievable. Examples exist such as Stanford University's "Scholarship Record" (https://studentaffairs.stanford.edu/registrar/faculty/scholarship-record). In Canada, BCcampus has been exploring platforms and processes in the area of competency-based education in the trades

Extract from: Duklas, J., Pesaro, J. (2015). ARUCC PCCAT National Transcript and Transfer Credit Nomenclature Project Phase Two: Consultation Document. Calgary, Alberta: Association of Registrars of the Universities and Colleges of Canada (ARUCC) and Pan-Canadian Consortium on Admissions and Transfer (PCCAT).

Subsection 3.7: Institutional Readiness for Competency-based Education and Learning Outcomes <pages 35-40>

Considerations:

Phase 1 research reveals a varied understanding of competency-based education and learning outcomes assessment in Canada or of international approaches to documenting student achievement. The findings also indicate there is not a common understanding regarding the co-curricular record among those surveyed. However, there seems to be a significant group of researchers, policy developers, and practitioners who are interested in expanding the conversation around documenting different student learning experiences.

Canada is not alone. As an example, three American associations are working to establish a common definitions framework for transcription of competency and outcomes-based learning at the program level for individual learners: the American Association of Collegiate Registrars and Admissions Officers, NASPA: Student Affairs Administrators in Higher Education, and IMS Global Learning Consortium. While the project is in its early stages, the proponents are consulting about the concept of creating a learning outcomes document (a competency record) that is separate and yet complementary to the transcript.

Currently, there are examples of institutions documenting competency-based assessment scores on transcripts in order to share learner achievement results. Further, organizations such as the Lumina Foundation and OECD are exploring enhanced assessment metrics for learning outcomes even at the individual student level. Some references are provided for those that are interested in delving into this topic further:

Elon University validates all information presented on a student's Elon Experiences Transcript. Validation occurs within each program responsible for the experience and is then maintained in a centralized system. Students do not personally enter any experiences onto their Elon Experiences Transcript.

The Elon Experiences Transcript is an official document of Elon University and is maintained on behalf of students. The Elon Experiences Transcript is not an official academic transcript.

Name: Jane Sally Doe

Degree: AB - Bachelor of Arts

Major(s): English

Minor(s): Political Science

STUDENT MOBILITY SUPPORTED BY DATA PORTABILITY

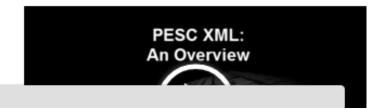

The ARUCC PCCAT National Transcript Standards and Transfer Credit Nomenclature Study validated the community's support for advancing student mobility through secure, validated, and trusted data exchange. Two international initiatives focusing on this area include the Canadian P20W Education Standards Council User Group (CanPESC) and the ARUCC Groningen Declaration Task Force (the "Task Force").

CANPESC

CanPESC is a national working group comprising representatives from application centres, allied organizations, and institutions from across Canada. It encourages the development and implementation of PESC XML data standards across the country and facilitates quality practices and student mobility through validated, consistent, and flexible data exchange. The following webinars are available for those wishing to learn more about PESC XML.

WEBINARS

XML PESC OVERVIEW

AIVIL PESC - PART Z

These videos were prepared by the Ontario Universities' Application Centre (OUAC) in 2014 as a university resource during the OUAC's Application Management System (AMS) Project. This systems upgrade project enables XML data distribution with Ontario's twenty universities.

GRONINGEN DECLARATION

The Groningen Declaration Network is an international organization that "... seeks common ground in best serving the academic and professional mobility needs of citizens worldwide by bringing together key stakeholders in the Digital Student Data Ecosystem." The Groningen Declaration supports the international mobility of people, promoting education and economic development worldwide by exchanging postsecondary data electronically. For Canada, the ARUCC Groningen Declaration Task Force, launched in 2014, is mandated to champion the engagement of Canadian institutions in the implementation of the Groningen Declaration by fostering an ethos, culture, and network that removes impediments for data portability, and provides the foundation for student mobility. These benefits will be realized throughout the various educational jurisdictions across Canada by fostering a pan-Canadian model of electronic data exchange that will serve Canadians and the world.

ARUCC AND PCCAT – ENSURING RESEARCH AND EVIDENCE GUIDE STANDARDS DEVELOPMENT

The Guide results from extensive national and provincial consultation. Its contents are deeply informed by the primary and secondary research conducted as part of the ARUCC PCCAT Transcript Standards and Transfer Credit Nomenclature Study. The research spanned two time periods: January through to April 2014 (Phase 1) and February to June 2015 (Phase 2).

Phase 1 research identified current transcript and transfer credit nomenclature practices in Canada and in four select international jurisdictions – United Kingdom, United States, Europe, and Australia. Phase 2 extended the consultation and tested potential new standards and definitions with regional associations and stakeholders across Canada.

CORE PRINCIPLES GUIDED THE RESEARCH

- Supporting student mobility
- · Respecting institutional autonomy and provincial authority
- · Encouraging clarity, consistency, and transparency
- · Building enduring standards from research and evidence
- · Encouraging broad and deep consultation and engagement of individual, institutional, and organizational stakeholders

SPECIFIC RESEARCH OBJECTIVES RESULTED IN THE PUBLISHED TRANSCRIPT AND TRANSFER CREDIT GUIDE

- · Articulating the enhancement requirements for the 2003 ARUCC Transcript Guide and testing its core principles and definitions
- Identifying at a specific, operational level the current transcript and transfer credit terminology practices in use across Canada within postsecondary institutions and by associated organizations
- Highlighting gaps and opportunities in current transcript and transfer credit nomenclature practices

SPECIFIC RESEARCH OBJECTIVES RESULTED IN THE PUBLISHED TRANSCRIPT AND TRANSFER CREDIT GUIDE

- · Articulating the enhancement requirements for the 2003 ARUCC Transcript Guide and testing its core principles and definitions
- Identifying at a specific, operational level the current transcript and transfer credit terminology practices in use across Canada within postsecondary institutions and by associated organizations
- · Highlighting gaps and opportunities in current transcript and transfer credit nomenclature practices
- · Identifying emergent thinking surrounding transcript and transfer credit terminology standards
- Identifying promising practices in various jurisdictions (with a particular focus on Europe, the United Kingdom, United States, and Australia)
- · Creating the transcript and transfer credit terminology standards Guide

THE RESEARCH EMPLOYED A VARIETY OF METHODS TO ENSURE BREADTH AND DEPTH

The research methods in Phase 1 included an initial online poll and a national survey which saw an institutional response rate of 57%. In spring 2015, the Phase 2 national survey saw participation from more than 200 people from across the country. Both phases utilized workshops, in-person stakeholder interviews, and reviews of foundational documents and websites available provincially, nationally, and internationally. In total, more than 200 registrarial and pathway professionals participated in regional workshops conducted in the 2014 and 2015 spring time periods. These efforts supplemented over 50 stakeholder interviews and included a review of more than 100+ sample transcripts and transfer credit policies from 40+ institutions. XML data standards for electronic data exchange were also reviewed.

The research findings are published online.

- Phase 1 Executive Summary
- Phase 1 Full Report
- Phase 2 Information release
- Phase 2 Consultation memo
- Phase 2 Consultation Document
- Phase 2 Consultation Findings

"[M]uch of what we know about student success focuses on the efforts of individual institutions. ... to improve student persistence and graduation at the institution of original enrollment. We know far less about the factors associated with student success for mobile students [A] new view may prove useful, in which students are the unit of analysis and institutions are viewed as stepping stones along a diverse set of educational paths."

(Hossler D et al February 2012 n 8)

FEEDBACK

FEEDBACK

The Guide is a living resource. If you are working on a transcript standard or transfer nomenclature framework specific to your institution and wish to seek advice or make a suggestion for enhancement, complete the following Feedback Form. Your comments will be sent directly to the Chair of the ARUCC PCCAT Guide Working Group, a team of registrarial and pathway volunteers. These individuals will review your comments, make relevant changes to the Guide, and/or contact you for follow up.
